FULL STACK DEVELOPER

I bring over 5 years of expertise as a seasoned full-stack developer with significant experience in mobile app development. Proficient in top-tier frameworks such as React, Vue.js, React Native, Flutter, Laravel, and Express JS, I am eager to capitalize on my extensive experience and further enrich my skill set in the dynamic development field.

TECHNICAL SKILLS

Frontend - Html, CSS, Sass, Jquery, Javascript, Typescript, React JS, Vue JS, WordPress
Backend - PHP, CodeIgniter v3, Express JS, Laravel, Strapi
Mobile - React Native, Flutter, Java
Databases - MongoDB, MySQL

EXPERIENCE

Fullstack Developer   Jan 2022 – March 2024
CodeRelix, Goa India

- Developed and implemented a comprehensive Gatepass-Register Management system for Essity using Laravel, enabling efficient creation, approval, and tracking of gate passes.
- Designed and launched an E-commerce platform for Toddlers & Tots, integrating React JS and Strapi to create a user-friendly interface for customers and an efficient dashboard for administrators to manage products, orders, and users.
- Spearheaded the development of the Davion Healthcare website, leveraging React JS and Strapi to deliver a dynamic and responsive online presence for Davion Healthcare Plc.
- Led the development of Mediquik, an innovative online pharmacy platform for Millionways, incorporating React Native, React JS, and Express JS to create separate applications for customers, delivery personnel, and pharmacies, along with an admin dashboard for comprehensive management of orders and payments.

Mobile App Developer   Feb 2020 – Dec 2021
CodeRun/CodeMax, Goa India

- Developed and implemented the Hubstaff Web App for CodeMax using Laravel, facilitating automatic generation and approval of comprehensive reports based on data from Hubstaff. This streamlined approach ensured accurate and reliable reports, saving valuable time and resources for the company.
- Designed and launched LiveConfirm, a React Native and Laravel-based app for CodeMax, offering enhanced security measures through two-factor authentication (2FA) and biometric authentication. The intuitive interface and robust functionality make it an ideal choice for organizations seeking to secure sensitive data while providing a seamless user experience.

- Spearheaded the development of the Ascendfins website using Laravel, delivering a dynamic and responsive online presence for ascendfins.in.
- Led the development of the LeaveMgt mobile app for CodeRun, integrating React Native, Codeigniter V3, and MySQL to provide a user-friendly solution for managing employee leave requests and approvals. The app utilizes Firebase(FCM) for notifications, ensuring prompt communication and streamlined leave management processes.
- Developed PMAce mobile app for CodeRun using Java, Django, and Postgresql, offering a comprehensive solution for managing projects, tasks, and user performance. The app features an efficient time-tracking system and utilizes Firebase(FCM) for notifications, providing a seamless experience for administrators and users in managing project timelines and optimizing productivity.

Jr Web Developer   *Jan 2019 – Jan 2020*
Apexaura, Goa India

- Developed a comprehensive Project, Task, and Resource Management Tool web app for Effective Architecture System (EAS) using Codeigniter V3 and MySQL. Integrated chart libraries for enhanced data visualization and incorporated Fullcalendar for simplified task allocation and scheduling, resulting in an intuitive and user-friendly interface that streamlines project management and boosts productivity.
- Designed and launched Architect RajeevSukh's website using HTML, PHP, jQuery, and MySQL, providing an online platform for showcasing architectural projects and services.
- Spearheaded the development of the EAS website for Effective Architecture System (EAS) using HTML, PHP, jQuery, and MySQL, delivering an informative and visually appealing online presence.
- Developed the GVM College website using HTML, PHP, jQuery, and MySQL, offering an engaging online platform for students, faculty, and visitors to access information about the college and its programs.

Frontend Developer Intern   *Sep 2018 – Jan 2019*
Haztech, Goa India

- Spearheaded the development of the Psytech website using HTML, PHP, jQuery, and MySQL, delivering an engaging online platform for showcasing company information and services.
- Mastered app development using React Native, acquiring valuable skills to create cross-platform mobile applications with efficiency and proficiency.

EDUCATION

Don Bosco College of Engineering   *Fatorda, Goa-India*
Bachelor of Engineering in Computer Engineering   *2014 - 2018*

Rosary Higher Secondary (HSSC)   *Navelim, Goa-India*
Goa Board of Higher Education (Science)   *2014*

Loyola High School (SSC)   *Margao, Goa-India*
Goa Board of Secondary Education   *2011*

PROJECTS

Project 1: Mediquik   *Express JS, React JS, and React Native*

- Comprehensive online pharmacy platform with 3 separate apps: **customer, delivery, and pharmacy**.
- **Customer app:** purchase medicine, manage addresses, add to cart, create a wishlist, view prescriptions.
- **Delivery app:** provides detailed routes, and includes a dashboard for monthly earnings and total orders.
- **Pharmacy app:** manages orders and views profits/orders.
- **Admin dashboard** manages all orders and payments.

Project 2: Toddlers & Tots   *React JS and Strapi*

- An e-commerce platform focused on kids' products with 4 user types: **Admin, Sub-admin, Vendor, and Customer.**
- Admin, Sub-admins, and Vendors can access a dashboard displaying analytics, user/order/product lists, and commissions/earnings.
- Customers can place orders online or cash on delivery payment, and **Delhivery Service** is used for order fulfillment.
